TRADE MARK

TO THE TRADE

CANANDAIGUA, N. Y., March 1, 1905.

We take pleasure in handing you herewith our new annual catalogue, exhibiting in one book, for the first time, our complete line of

LISK'S PATENT ANTI-RUSTING TINWARE  
 HIGH-GRADE, HAND-MADE PIECED TINWARE  
 EXTRA-HEAVY RETINNED STAMPED WARE  
 HEAVY ALUMINUM GALVANIZED WARE  
 HIGH-GRADE NICKEL-PLATED COPPER WARE  
 LISK'S FOUR-COATED ENAMELED STEEL WARE  
 . . . . . AND . . . . .  
 LISK'S IMPERIAL GRAY ENAMELED STEEL WARE

The first section is devoted to our line of Anti-Rusting Tinware, in which you will find a number of new features of importance, among them being Lisk's New Seamless Oval Dinner Pail with cup, cover and trays stamped seamless throughout, Lisk's Seamless Stamped Wash Boiler Cover, made entirely from one piece of metal, and Lisk's New Seamless Self-Basting Roaster. These goods are entirely new, have been produced with great care and expense, and are the only ones of the kind on the market at the present time.

Every article illustrated herein is made with the same careful regard for detail of construction, and high quality of material and workmanship, that has enabled us to attain the position we occupy as manufacturers of exclusively high-grade products only.

We are the sole owners of all of the best patents, and purpose to protect our customers and ourselves against imitators.

Every article of our line of Anti-Rusting Tinware is warranted perfect in every respect and absolutely rust-proof.

We shall continue to spare no pains, by the employment of skilled labor and the use of the finest materials obtainable, to supply our customers with a line of ware that is satisfactory in every respect.

Our goods are sold exclusively to the retail trade and cannot be handled by jobbers.

We thank you for your generous patronage, good will and confidence,  
and remain, Yours respectfully,

Yours respectfully,

THE LISK MANUFACTURING CO., Ltd.

IN THIS SECTION MAY BE FOUND

## LISK'S

High-Grade Hand-Made Plain Pieced Tinware

Heavy Retinned Plain Stamped Ware

Aluminum Galvanized Ware

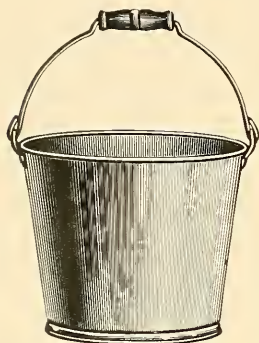

Full-Weight Planished Copper and Nickel-Plated  
Copper Ware

THE continually increasing demand from our patrons for this line is such that we have found it necessary to add largely to our assortment, and we believe that you will find it, as shown, to be very complete and satisfactory.

The line of Plain Pieced and Stamped Tinware shown, while not guaranteed rust proof, is of the highest quality possible, and made in designs that have met with your generous approval.

Our Aluminum Galvanized Ware is made under a process owned exclusively by us, and the other goods shown, we believe, you will find to be the best of their kind upon the market, and a very profitable and satisfactory line to handle.

# GUARANTEE

E, The Lisk Manufacturing Company, Limited, do hereby guarantee and warrant each and every piece of our FOUR-COATED ENAMELED STEEL WARE against all imperfections arising from ordinary usage. We will make this guarantee good by replacing, free of all charge, each and every article that may scale or blister by exposure to heat. We also guarantee every article to be coated with FOUR COATS OF LISK'S ENAMEL, DOUBLE GLAZED BY OUR SPECIAL GERMAN PROCESS, and to be absolutely pure, and to contain no substances of an injurious or deleterious nature whatever.

THE  
LISK MANUFACTURING COMPANY  
Limited.

TRADE MARK.

The Following and Last Section of Our  
Catalogue Illustrates

## LISS'S

### Four-Coated Enameled Steel Ware & Imperial Gray Enameled Ware

THESE goods have excited the wide admiration and approval of our most particular customers, and we have taken great pride in attaining for them a standard of excellence which we believe to be entirely unapproachable and not found in other lines.

For originality and beauty of design, purity of enamel, durability and wearing qualities, they have no equal. Our statements as to purity are supported by analyses of noted chemists, copies of which may be found on pages 440 to 443, while our claims for durability are backed up by the most liberal guarantee ever given with a line of Enameled Steel Ware. We have selected our colors with painstaking care, and believe them to be the most attractive and salable on the market. New goods are being added from time to time.

## CERTIFICATE OF ANALYSIS.

No. 3294.

The sample of ENAMELED WARE received from you December 4th, 1901, marked "The Lisk Manufacturing Co., Canandaigua, N. Y.", has been submitted by us to a thorough chemical examination, as a result of which we find that the coating or enamel contains neither Arsenic, Antimony, Lead or other substances which would render it injurious to health.

We therefore consider this article suitable in every way for all culinary and other domestic uses.

Respectfully,

To The Lisk Manufacturing Co., Ltd.,  
Canandaigua, New York.

Gentlemen:-

We have examined the sample of  
Enameled Ware, labeled with your name  
and trade-mark, recently submitted to  
us.

The enamel or coating is of excel-  
lent quality, homogeneous, free from  
cracks, pinholes or other mechanical  
imperfections. It does not contain any  
arsenic, antimony or lead--poisonous  
substances which are frequently present  
in inferior enamels.

Yours truly,

# Columbus Food Laboratory

The Lisk Manufacturing Co., Ltd.,  
Canandaigua, N.Y.

Gentlemen:—

We beg leave to report the results of analyses of a sample of enameled iron cooking utensil. This sample was given a very critical test as to its ability to expand and contract under heat, and came from the test without a check. An attempt was made to get a watery extract of the enamel by treating it in the finely pulverized state with boiling water for a considerable time. It remained completely insoluble, thus proving that it could not be attacked by the water in the process of cooking.

The dish was treated with such a per cent. of acetic acid as is found in ordinary vinegar, without corrosion.

An examination for poisonous metals, such as arsenic, antimony, etc., was made. Nothing of that nature was found.

An extract of the enamel was made and administered to a guinea pig. The animal remained normal, and no disturbance of the physiological functions could be detected.

## CONCLUSIONS.

1. The enamel has exceptional adhesive qualities.
2. It will expand and contract under heat without cracking
3. It is entirely insoluble in water.
4. Organic acids, such as are found in tomatoes, vinegar, spices, etc., will not attack the enamel.
5. It contains no poisonous or otherwise harmful metals.
6. It contains nothing that could interfere with the normal physiological functions of the body.

Very truly yours,

The Columbus Food Laboratory.

Per

Gentlemen:--

Upon analysis we find the samples of enamel ware which you sent us to contain no substances deleterious to users of the same. Our analysis of this enamel ware is submitted herewith.

We also find that this enamel is practically insoluble under all conditions approaching those found in the preparation of food or drink.

Physical tests made upon this ware show the enamel to be strong, tough and pliable; and that it adheres well to the iron, will stand sudden changes of heat and cold and does not chip easily when struck.

Yours very truly,

DICKMAN, MACKENZIE & POTTER.
